

Team 14
Jacob Stallings
Quinton Chudik

Assignment 3 Teamwork

For this assignment, in the previous ones, we worked on most things sitting down together looking at the same computer. Sometimes one person would be typing, another looking at the docs. We also sometimes both ssh-ed into the VMs at the same time and edited different files. Sometimes Jacob would edit the yaml files for Kubernetes while Quinton managed the Kubernetes Pods while both logged into the VM. Once again because we are roommates, it was easiest just to do everything together.
